What is the clinical specialty practice?
The clinical specialty practice is a compulsory teaching activity in the curriculum of the Faculty of Medicine, beginning with the 1st year until the 5th year of study.

What is the duration and the period when the clinical specialty practice takes place?
According to the curriculum, the number of hours for the summer practice is 90 hours for the 1st year and 100 hours for each of the 2nd till the 5th year of study.

To cover these 90-100 hours, the summer practice takes place during 4 weeks: 4,5 hours per day for the 1st year and 5 hours per day for the 2nd till the 5th year of study.

The clinical specialty practice takes place between the 4th of July and the 16th of September 2016 and it can start on every Monday of the above mentioned period. (to achieve the 4-week practice, this should start no later than 22nd of August 2016)

THE SUMMER PRACTICE CANNOT TAKE PLACE DURING THE ACADEMIC YEAR.

Where does the clinical specialty practice take place?
The 1st and the 5th year students do their clinical specialty practice in the cabinets of family doctors.
The 2nd and the 4th year students do their clinical specialty practice in the clinical sections of Cluj Napoca or in the students’ home town, provided that they should conclude the Summer Practice Agreement between the UMF „Iuliu Hatieganu” and the health unit (public or private).
The 2nd and the 3rd year students do their clinical specialty practice in medical clinical sections. The specialties included in this category are: internal medicine, cardiology, gastroenterology, hepatology, neurology, psychiatry, hematology, pulmonology, nephrology, diabetes and nutrition, endocrinology, infectious disease clinic, dermatology, pediatrics, medical oncology, rheumatology, medical rehabilitation, geriatrics, anesthesia and intensive care medicine (ATI), emergency medicine, allergology and immunology, clinical pharmacology.
The students of 4th year do their clinical specialty practice in surgical clinical sections. The specialties included in this category are: general surgery, oncological surgery, orthopedics and traumatology, neurosurgery, otorhinolarynology (ORL), pediatrics surgery, ophthalmology, cardiovascular surgery, obstetrics and gynecology, thoracic surgery, urology, plastic surgery.

Who can be the practice supervisor?
The supervisors for the clinical specialty practice must be specialist doctors.

What are the educational goals of the clinical specialty practice?
The educational goals for the clinical specialty practice are presented in the Workbook of practical skills for medical students.

Which are the manoeuvres that the student must perform during the medical specialty practice?
The medical manoeuvres that each student will have to perform during the medical specialty practice are summarized and presented in the Workbook of practical skills for medical students.

How many credits does the clinical specialty practice have?
For this activity the students will receive 2 credits per year.

How is medical specialty practice evaluated?
The medical specialty practice is marked with a pass/fail grade by the comission appointed by the Faculty Council. Marking and granting the credits are done between 19th of September and 30th of September.
What are the documents that have to be submitted for the assessment of the medical specialty practice?

Each student will submit the following documents to the year secretary until the 19th of September:

1. The Workbook of practical skills for medical students filled in according to the rules of the academic year in process.
2. The Evaluation Sheet filled in and signed by the supervisor specialist doctor.
3. The Medical Practice Agreement.
